

Let's Pocketalk!

Start a world of conversations.

SHOWN AT ACTUAL SIZE

Pocketalk™ is the new and easy way to have a real conversation with someone who speaks a different language.

- Gain back precious time by removing the need for a third-party translator.
- Ensure those in need (and their families) can engage in a direct conversation.
- Have confidence in communications with those you serve and a solution to meet your needs.
- Instant two-way voice translation.
- Easy to use.
- One device, 74 languages.
- Be understood and understand others — just like a local.
- Smart device that learns as you use it.

POCKETALK™
Imagine where it can take you.

Better than a phone app. In so many ways.

Better microphones.

Speak the way you normally do. Dual microphones with noise cancellation pick up your every word.

Better battery.

Keep the conversation flowing for hours. Press the power button to quickly put PocketaTalk to sleep and preserve battery charge.

Better design.

Simple interface for easy two-way conversations

Better speaker.

PocketaTalk keeps the conversation loud and clear — in an office, noisy café, or outdoors — with two built-in speakers. (1.5 Watts)

Better Speed.

Works with WiFi, mobile data, or personal hotspot.

Better Accuracy.

Connects to the internet for access to robust language engines and cutting-edge cloud technologies for highly accurate translations.

Better than handing over your phone.
