

Say hello to Pocketalk

The only two-way translation device offering authentic, accurate communication for 74 languages

- Converse in 74 languages
- Sleek design with large touchscreen that provides a text translation for additional clarity
- One-button translation for simpler translations in fewer steps
- High quality noise-cancelling microphones and two powerful speakers
- Text-to-translate camera instantly recognizes and translates text, the written word, and signs.
- Conversion: computes exchanges for currency, length, width and temperature
- Complimentary 2-year cellular data plan that provides coverage in over 130 countries/regions
- Available in White, Black and Gold

What others are saying

"I got a chance to play around with the Pocketalk and it's a slick little gadget about half the size of my Pixel 2. Only a few taps on the large, well-lit screen are needed to set up the device — whether you're translating Farsi to English or Argentinian Spanish to Cantonese — and once it's done, it can be activated with a single touch."

engadget

Parents

"Anyone who has ever encountered a language barrier can appreciate Pocketalk, a credit-card-size device which takes your sentence, spoken out loud, and then says it in any of 74 languages. You don't need to sweat finding the right words or pronunciation! It would be great for any family trip abroad, but looking deeper, it could also be a great tool for kids in language lessons, particularly if your child is studying a language you never learned and you want to help."

"Essentially the sort of translator device you might've seen in Star Trek, the Pocketalk acts as an audio/visual go-between for folks at odds with language. Once the user sets what language is going in and which needs to come out, he or she need only speak into the device for it to reproduce that speech in easily readable text for all to read in the local tongue."

MENSBOOK

FORBES

"Pack the compact Pocketalk in your bag and you'll have 74 languages at your fingertips. The device is smaller than an average cell phone but gives you the power to communicate almost effortlessly around the world."
